Skin care with aloe vera

Instructions No. 2770

Difficulty: Beginner

Working time: 2 Hours

Treat yourself and your skin to intensive care with a homemade body lotion. This has been enriched with aloe vera. Aloe vera gives the skin a lot of moisture and at the same time provides an anti-aging effect. In addition, aloe vera helps with itching and has a cooling effect. This body lotion is therefore suitable for both dry and normal skin.

DIY Body Lotion

Ingredients:

100 ml coconut oil
50 ml aloe vera
Approx. 1 tbsp. cosmetic emulsifier

Melt the coconut oil in a melting pot and add the aloe vera and emulsifier. Mix everything together well.

Pour the liquid mixture into the jar.

Important: The aloe vera will settle at the bottom in spite of the emulsifier. For this reason, the mass must be stirred again and again in between. After about 1.5 hours, the mass will become more solid. Now the creamy lotion can be stirred again.

Would you like to give the body lotion as a gift? The jar with the cream can be beautifully presented as a gift in a storage tin.

To decorate the storage jar, print out the free template. Cut out the label and glue it onto kraft paper. With a small border, also cut out the kraft paper and stick this onto the jar.

Place the jar in the storage tin and close it with a ribbon.

Must Have

Coconut oil

Weight: 120 g

7,69 € (1 kg = 64,08 €)
~~RRP 8,90 €~~
