

Anleitung für ein Dekohaus in Pastell

Instructions No. 1301

Realise your own dream house en miniature: The decorative house was designed in pastel shades to match the current living landscape.

And this is how it is done:

In the first step the **wooden house** is **primed with** white paint. The floor of the decorative house is now painted in green (grass look). Mix a little white in old pink Handicraft paint and decorate with this colour single elements like doors, windows etc. Roof and chimney can be painted with the colour Grey(also brightened with white). The corners of the house, the edge of the roof and the fence can now be painted a little darker in grey.

Now put some white Handicraft paint on a damp sponge or brush. Wipe the paint carefully over some parts of the fence and over the house corners (wiping technique)

Finally, **paint** the roof tiles with a fine brush in grey colour. Start by painting the top row of tiles and work your way down row by row.

The decoration house is now painted. As a special eye-catcher, the "garden" of the house can be decorated with other small accessories such as a milk can and slices of bark.
