

Anleitung: Tischdekoration aus Frühlingskranz mit Pfingstrosen

Instructions No. 1070

Let the spring move in with you. This wreath arrangement is a refreshing decoration after a long winter and thanks to the fabric flowers it will last as long as you like. The basis for this arrangement is a wreath of hay and Brushwood. A wonderful Nature-mix that will decorate your table for example.

And it's as simple as that:

How do I decorate the spring wreath?

Take a cardboard box and put the wreath on it. Draw with a pencil once around the wreath and then cut out the circle. Then glue the wreath to the cardboard with hot glue and cut off any protruding edges from cardboard. The cardboard surface serves as the bottom of the arrangement and should not be visible

Take as much Flower arrangement foam as you need to fill the wreath and insert it into the wreath. Now shorten the flower picks to the right length and put them into the plugging compound. Finally, tie a pretty bow out of ribbon and put it on the wreath with a little wire or roman style

Can I also use real flowers for the wreath?

Yes, you can also use real peonies or other flowers. For this you should use Flower arrangement foam , which is suitable for wet arrangements. This is cut to the desired shape and then placed in water until it is soaked. Then place some plastic foil in the middle of the wreath to avoid water stains and place the wet plugging compound on top. Then stick your fresh flowers into it. The wet planting material will gradually release the water to the flowers so that the flowers do not hang their heads so quickly

Extra tip for putting flowers:

- for more naturalness put a few wild grasses in the wreath
- before you plug the plug in, select a point in the arrangement where the eye of the beholder should be particularly attracted. This is where you should place your main decoration. All other flowers should be placed around this main flower.
