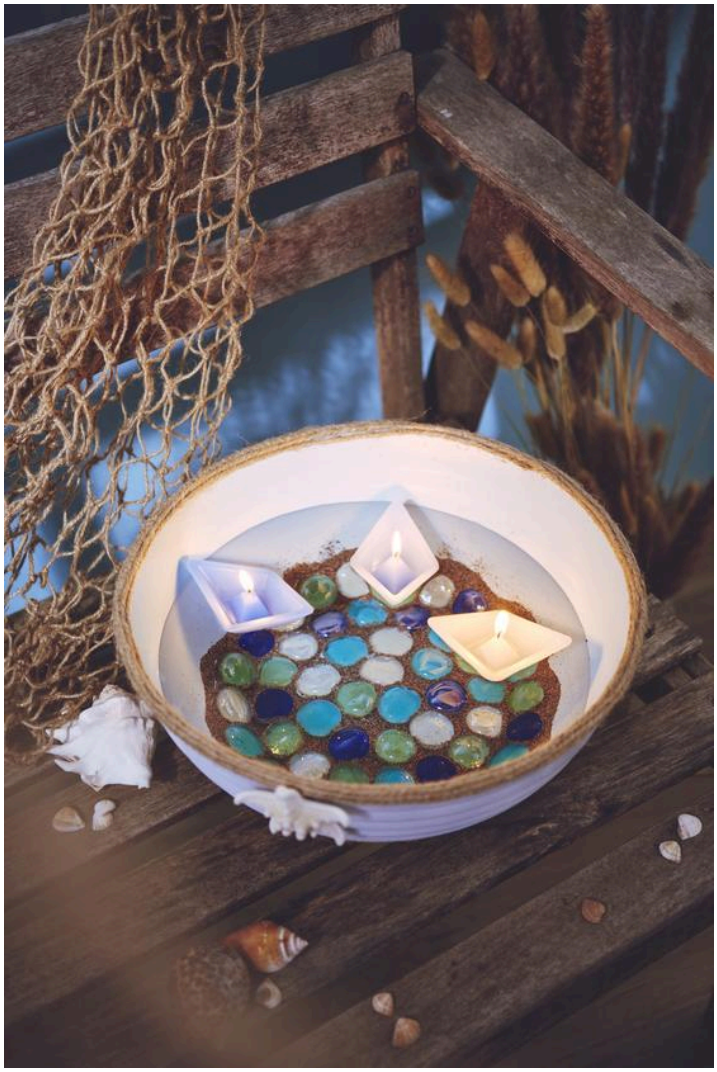
Bowl with Candle Floating Boats

Instructions No. 2239

Difficulty: Advanced

Working time: 5 Hours

Our small **pond** is perfect for decorating the balcony or terrace. In the evening, the **little boats**, which are cast as **candles**, can also be lit and create a cosy light.



The bowl with the boats is made as follows:

Make the **floating candles** according to the instructions. Tip: To achieve different shades of colour, such as different shades of blue, first add a little colouring granulate to the melted wax, fill a boat with it and then add more granulate to the wax and fill the next boat. Repeat this for the third shuttle.

Allow to dry thoroughly.

Spray the inside of the **planter** with pastel blue and leave to dry. Then spray the outside with white paint and let it dry. Then spray with **clear lacquer**. Use the craft glue to glue **sisal cord** around the bowl and fix a **starfish** to the edge of the bowl.

Then spread **Uhu Max Repair Universal Glue** on the bottom of the bowl. Place **muggle stones** in the desired Munster and colour on top. Sprinkle with **mineral sand**. Allow to dry for 24 hours.

The bowl can now be filled with water. Carefully remove the boats from the mould and place them in the bowl. Your beautiful summer animation is ready.
