

Casting projects with Raysin

Instructions No. 3188

Difficulty: Beginner

Working time: 2 Hours

Would you like to embellish your home with unique, self-designed decorative pieces? Then moulding projects with Raysin are just the thing for you! From small candle holders to larger bowls, you can create your own designs in no time at all with Raysin. The instructions show you how to proceed and what you need to pay attention to in order to achieve professional results. You can also find out the difference between Raysin 100 and 200 [here](#).

Let your creativity run wild and discover how much fun moulding your own decorative items can be!

Pouring out the moulds

Choose a silicone casting mould that meets your requirements and pour the finished mixture into it. Gently shaking and tapping the mould will help to distribute the mixture evenly and remove any air bubbles. This ensures a particularly smooth surface for your moulded pieces.

Drying and demoulding

After about an hour is the ideal time to remove your creations from the mould. Allow them to continue drying in the air to achieve optimum strength. Remember that your castings may initially have a slight grey tint, which will disappear once they are completely dry, leaving them pure white.

Finishing the castings

Rough edges can easily be smoothed with fine sandpaper. If you want to create a lid to close a tin, for example, you can use self-adhesive cork. Skillfully cover the cut edges by cutting them cleanly.

Creative final design and candle moulding

Now comes the fun of decorating! Place a paper tealight in your tealight holder and the spiral candles in the corresponding stick candle holders. To ensure that everything is stable, place wax discs on the bottom of the holders.

Melt wax for the candle tray - measure out approx. 1.5 trays of wax for this. Organic wax with a melting point between 60 and 70 °C is ideal as it is environmentally friendly and easy to work with. Make sure that you do not exceed this temperature. Plug the wicks into their holders and dip them briefly into the liquid wax before placing them in the prepared bowl. Now carefully pour in the liquid wax.

Ready to create your own stylish decorative objects? You can find all the materials you need to start your creative moulding projects in our online shop. Discover the variety of silicone casting moulds and the right Raysin powder for your ideas. Start your DIY project today and create unique works of art to suit your taste!
