Christmas wreath made of modelling clay

Instructions No. 2585

Difficulty: Beginner

Working time: 4 Hours

This noble wreath is a wonderful eye-catcher for the Christmas season. The ball wreath was created from modelling clay and then complemented with a few decorative materials such as decorative wicker, bells and scatter pieces.

Christmas wreath made from modelling clay

Mix the concrete powder with water to form a mass and shape many balls of different sizes. Place the wet balls on top of each other to create a wreath.

As soon as everything has dried, you can paint some of the balls with craft colours if you wish. Allow the paint to dry.

Place the finished wreath of modelling clay on a plate and put a candle in the middle.

Finally, arrange the whole thing with decorative wicker, bells and stars.

Must Have

Concrete for kneading, 1,5 kg

Fill volume: 1.5 kg

9,99 € (1 kg = 6,66 €)
