Concrete world map

Instructions No. 1746

Difficulty: Advanced

Working time: 45 Minutes

The picture relief is a wonderful example of how well different casting compounds harmonize together. With casting concrete and Raysin or Keraflott casting compound a great picture relief is created. With light it is mounted on a wooden plate and becomes an eye-catcher.

Casting in two phases

First mix white **casting powder according to the product instructions** to a liquid mass and pour this into the casting mould "World Map".

As soon as this first casting compound has dried to a solid white form, mix Creative Concrete **also** according to the product instructions and pour this second compound onto the first layer in the casting mould

Mounting on the wooden plate

The **VBSdecorative wooden board** is supplied with a suspension for upright formats. First prepare the **suspension on** the back so that the wooden panel can be hung crosswise.

Take the cast picture relief carefully out of the mould and **fix** it with **VBS Effect Glue** on the wooden board. This glue is liquid when applied. Although it dries somewhat slower than hot-melt glue, it dries to a particularly durable fixation

Arrange a micro **light chain** around the picture relief and fix it too. You should use hot glue to fix this chain of lights (easier to remove later).

Decorate

Decorate the decorative wooden panel with a sisal cord. Label the picture relief with the coordinates of your favourite place - both give your picture that special something.

Must Have

Casting mould "World Map"

Fill volume: 800 ml
Length: 30 cm
Width: 20 cm
Height: 20 cm
Thickness: 1 cm
Material: Plastic, Plastic

8,19 €
