Deco Ring Love

Instructions No. 1938

Difficulty: Beginner

Working time: 30 Minutes

Simple metal rings can be transformed with little effort and material into real decorative highlights in your own four walls. The stylish rings should not be missing in any living area, as they are among the decoration must-haves of the year.

It's as simple as that:

First spray the metal ring with edding **spray in pastel pink.** Once the spray has dried, you can use edding **Spray in** rose gold to create **shimmering** accents. Let the paint dry again

Cut off the from **wire** and from **Paper-Knitted tube** a piece of wire approx. 70 cm long. Insert the wire into this Knitted tube and form the lettering with the prepared wire. You can download the **free template** and use it as a help. Of course you can also form a word or a name of your choice.

The lettering is attached **to the** ring with **hot glue**. Finally, set **accents** with artificial flowers, which you can also fix with hot glue.

In this way, the metal rings can be designed according to your mood and can also be adapted to the seasons with matching flowers and leaves.
