Decorative wooden sign

Instructions No. 1752

Difficulty: Beginner

Working time: 30 Minutes

Are you looking for a spring-like decoration? In this guide we show you how to create this beautiful wall decoration with only little effort and material.

This is how it is done

First of all the decorative wooden plate is decorated with **VBS Handicraft paint** in Apricot primed

Tip: Carry the colour with a **Paint sponge** on. This allows the paint to be distributed more evenly and no brush strokes are visible at the end

After the paint has dried, the wooden board is coated with **Chalky Wax**, which serves as a separating layer between two colours. The drying time is about 15 **minutes**. The drying process can be slightly accelerated with the help of a hairdryer. Then apply Chalky **Color in** antique white. For the shabby **look**, simply apply the dried colour carefully with **Sandpaper** grind down.

Afterwards the lettering is sanded with **VBS Handicraft paint** in the colours and Mint painted

After drying, the lettering can be placed in the middle of a wooden plate and fixed with some hot glue

Finally, decorate with spring-like sprinkles as desired.

Must Have

VBS Decorative wood panel

Length: 29 cm
Depth: 1.5 cm
Width: 29 cm
Thickness: 0.7 cm
Material: Pine wood

5,99 €
