

Dekostern mit Häuserfront

Instructions No. 1025

With this decorative star you can turn entire window fronts into Christmassy shop windows. The illuminated star spreads a cosy atmosphere and the foot on which it stands is ideal as a small stage.

Wrapped in a festive Napkin and decorated with a beautiful house front made of embossed metal, you will certainly enjoy this star in the years to come.

And it's that easy:

Prime the aluminium sheet with white paint and let it dry.

Glue the upper, printed layer of Napkin on the metal and let the paint dry well. Cut out the motif and emboss the contours on the motif side with the metal pressing tool. Then turn it over and emboss the surfaces from the back. Use the special mat, it makes this work easier.

Glue the remaining napkin motifs onto the decorative star. The motifs can be placed very easily with spray adhesive 404, because you can remove them again until the Position right. Then fix it with Napkin varnish. When everything has dried well, glue the front of the house to the star with hot glue.
