DIY travel case

Instructions No. 1972

Difficulty: Beginner

Working time: 3 Hours

So that you have all your **travel documents** at hand or can organise your **souvenirs of the** last trip in style, we explain in our instructions how to **make** this beautiful travel case. In the inside compartment you can keep your documents and can, for example, take out your passport, flight documents and everything else you need right away at the flight control and you don't have to spend a lot of time gathering the necessary documents.

This is how the travel case is made:

Divide the DIN A3 sheet of **rock paper** in half. One half becomes the "envelope" of the folder. From the rest of the rock paper, cut the remaining parts of the folder according to the template. The small rectangle becomes the window and the large part becomes the inside pocket.

Glue the envelope with the complete **Straw silk paper** "Map" using **Napkin varnish**. To do this, apply it to the envelope with Napkin varnish a brush, place the envelopes on top Straw silk paper and brush them again with Napkin glue.

After drying, fold the envelope in the middle lengthwise.

Glue one side of the inside pocket with the **Straw silk paper** "Seaworld." The other side we have designed with **watercolours**

Unfold the envelope. Where papers are to be inserted later, sew the inside pocket to the edges with a straight stitch. Sew a partition in the middle, on the template the dotted line

In our example we have the envelope with **modelling cream** and a **Stencil** designed. To do this, place it Stencil on the desired surface and best of all, apply the modelling Spatula cream to the desired motif of the **Stencil** apply. We have also created the "viewing window" with bronze modelling cream. Cut out the window from the stone paper and dab it with the modelling cream. Alternatively you can paint Handicraft paint it with one. Attach four screws to the "viewing window" Brads on. First fix it with double sided on Adhesive tape the cover and also sew it on with a straight stitch

Use the **hole puncher** to make a hole for the rubber band. Thread it **through** this hole with an anchor pendant and knot it inside

Now you can put a **name tag in** the viewing window.

Must Have

Stone paper, DIN A3

Grammage: 300 g/m²
DIN format: Array
Material: Natural material

5,49 € (1 m2 = 42,23 €)
