Fabric fish at anchor

Instructions No. 2223

Difficulty: Advanced

Working time: 3 Hours

Ahoy! Set your home on course and arrange beautiful **maritime decorations**. Our **anchor** with the self-sewn **fish** is an eye-catcher and brings the sea feeling to your home.

This is how you create this beautiful maritime decoration:

First, prime the **anchor** in your desired **craft colour**. In our example, we chose the colour mint. The edges are created with the Easy Rust colours. First dab on the darker colour and then add accents with the **rust red colour**. Colour three brackets in the same way.

Drape a piece of the netting on the anchor and attach with craft glue.

Download the **pattern**. Cut the head and the body of the fish once each, and once mirror-inverted. Sew the head and fin pieces right sides together. Then place the two fish pieces right sides together and sew the fish together with a straight stitch all the way around except for a turnaround opening. Sew in a piece of the cord at the head of the fish. This will later serve as a hanger.

Stuff the fish with cotton wool and then close the turning opening by hand.

The fish can now be hung from the net with the clips.
