Gartenregal mit Chalky Farbe und Serviettenmotiv

Instructions No. 1438

Difficulty: Advanced

Working time: 45 Minutes

Create order in the garden or on the balcony! The decorative wall shelf is also an absolute eye catcher.

Wall shelf in Chalky look

First prime the wall shelf with green Chalky Outdoor Color. Once the colour has dried, apply a second coat of Chalky Wax. When dry, apply a third coat of white Chalky Outdoor Color. With Sandpaper now carefully sand off some parts of the shelf. Through the protective wax layer, the lower chalky colour will shine through at the treated areas, creating the typical chalky effect.

Applying the napkin motif

Cut out the motif from Napkin and remove all lower layers of paper so that only still has the layer with the printed paper motif left. Spray the Napkins-base of the wall shelf with removable spray adhesive and position the design. Then glue it on with Napkin varnish

Finally, glue further accessories such as small lace bows and Embellishment onto the wall shelf.
