

Glasglocken mit Tannendeko aus Papier und Stoff

Instructions No. 1506

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 1 hour

These pretty Christmas trees do not look only enchanting, they are also made in a few steps. Treat yourself to your personal winter decoration.

Sewing fir trees from fabric

First download the **motif template** for the small **fabric** fir trees **and** print it out. Transfer the template with the [Line Ex Pen](#) (the Ink deletes itself after some time) on the substance. Now cut the fabric, taking the seam allowance into account. Now simply put the Fabric cuts on the left and sew the small fir trees together except for a small opening at the bottom.

Stuff your firs with fluffy [cotton wool](#)

For the "tree trunk" take a small piece of a branch from the **forest** . Fasten it in the small opening on the fir tree and at the bottom on the base of the Glass bell.

Snow fir tree made of Paper

The **fir tree from Paper** is also included in the downloaded **motif template**. Transfer the template 4 times **with** a pencil to [white Coloured paper](#) and cut out the fir trees. One tree is now cut in half **from top to** bottom in the middle, and a second tree is also cut in half **bottom to top**, so that both paper firs can then be inserted into each other

In this way a small **3-D-Fir** is created **from Paper**. The 2 remaining firs you cut open completely in the middle and glue them with some [Handicraft glue](#) to the central webs of the basic fir.

Decorate

Then design the "finish" for that special something. For this, poke with a **Paint sponge** something [Decorative snow](#) on the glass covers. Place individual **fir branches** next to the trees, attach small **Embellishment** on the fir trees and wrap a [micro LED light chain](#) around the Paper-Fir

Arrange everything on the **wooden base** of each glass dome and fix it with **glue**. Finally, simply place the glass dome on the decorated wooden base.
