Glass bell with papercut

Instructions No. 2402

Difficulty: Advanced

Working time: 4 Hours

An impressive and fascinating **glass bell designed with papercuts**. With a few simple steps and a little skill, you can also create this work of art. You can play with the colour, the choice of leaves and the height and create new **eye-catchers** again and again.

This is how you design the glass bell jar:

First place the **wooden balls** on the **skewers** and fix them with a little glue. To do this, carve the skewers slightly thinner with the cutter. Now paint them in the colour of your choice (the colour used here is lavender) and glue them into the opening of the bell base. Your papercut artwork will look particularly lively if you create the skewers with the balls in different heights.

Now transfer the **templates** to the desired **photo cardboard**. In our example, we chose the colour lilac. Cut out the motifs and glue them to the skewers using hot glue.

Paint the outer edge of the base of the glass bell with **craft paint**.

Must Have

Scalpel Comfortline

Number of parts: 6
Material: Metal

15,99 €
