

Glöckchen mit Spitze im Landhaus - Stil

Instructions No. 981

With this decoration with the small Terracotta-pots the effect is definitely greater than the effort. You can design these little bells again and again, always new, always different. The colored Lace-border provides the romantic detail. Hanging on a branch or as a mobile with different lengths of cords, the bells look harmonious. If you cover them with the lacquer, you can even hang these little jewels in your garden.

And it is as simple as that:

Prime the pots inside and outside in white. Apply the lacquer on the dry paint. Glue the tip around the Terracotta-pots with hot glue. Tie a knot in the Cord and thread it through the top opening
