Illuminated Christmas trees

Instructions No. 1841

Difficulty: Beginner

Working time: 45 Minutes

Illuminated decorations are an important part of Christmas. Because especially in the dark season, light creates a beautiful atmosphere.

Print out the free motif templates **in** the size you want and transfer them twice onto the star foil. Cut out the trees with scissors. Lay the fir trees on top of each other and sew the edges together with the sewing machine. Of course you can also sew the edges by hand instead of using the sewing machine. Leave a small piece open at the bottom of the "trunk".

Place a micro **LED light chain and** a bamboo stick **inside** the tree. The tree is **placed** in the middle of the miniature logs using the stick. Alternatively, you can also glue several bark discs on top of each other **with wood glue**. Drill a small hole in the middle. There you put the one Fir in. If necessary, put some glue **into** the drilled hole to fix the whole thing.

For a particularly shiny decoration you can fill the fir trees with glitter, stick stickers on them or use the star foil **"Magic Star" glitter** use

Are you looking for more luminous decoration? Our beautiful shaking stars are made according to the same principle as the illuminated fir trees. The detailed instructions and templates can be found here.

Must Have

VBS Star foil "Magic Star"

Length: 50 cm
Width: 50 cm
Thickness: 0.2 mm
Material: Plastic

4,29 € (1 m2 = 17,16 €)
