Instructions for a sewn school cone

Instructions No. 1360

Difficulty: Advanced

Working time: 1 hour 30 Minutes

This tulle bag's gonna need stitches! Thus the schooling becomes an unforgettable result. On the school bag you can sew Chalkboard fabric or embroider the name of the child or apply a Motv. And the best thing is: After school enrolment, the school bag turns into a great cuddly cushion!

Material

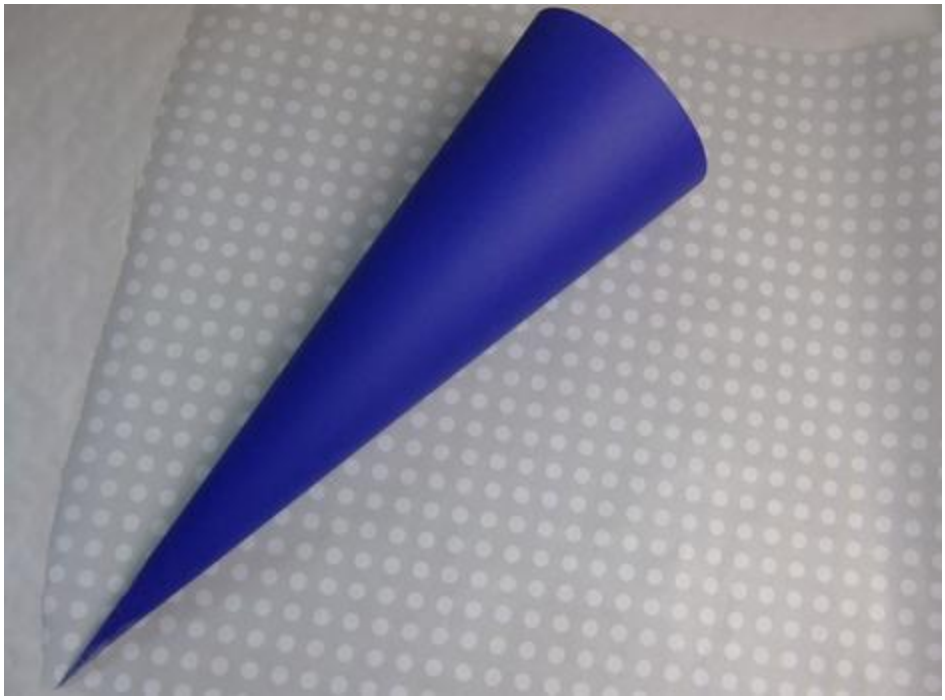

The school bag was made of

1 blank school cone, 1 wooden tip for the school cone, about 60 cm star fabric, about 68 cm plain Cotton fabric, 1 brown Felt sheet, some Chalkboard fabric, embroidered fabric or the motif to be applied, serrated tape and a sponge.

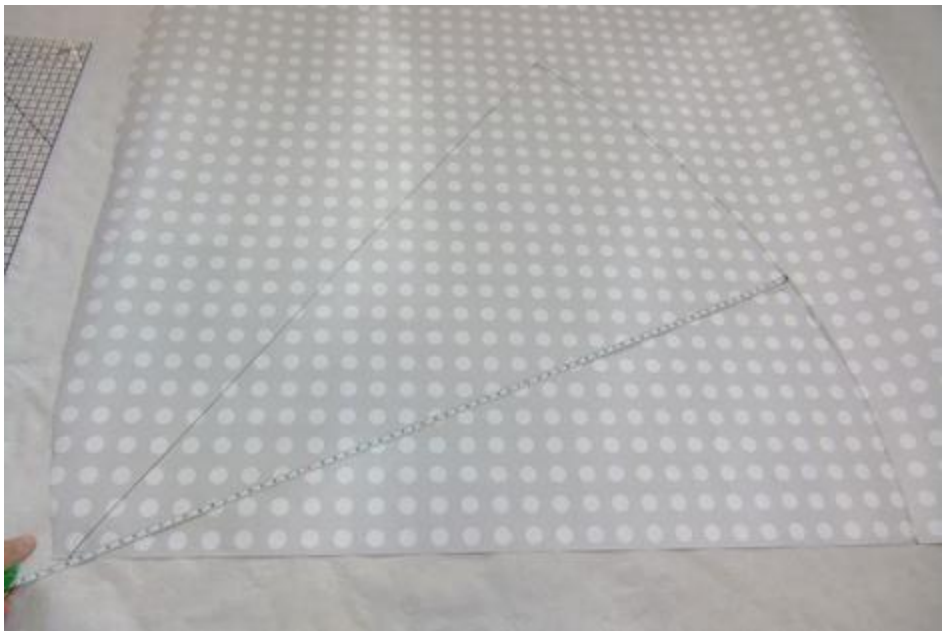

You need as an aid

Sewing thread, Textile glue, temporary glue for textiles, a line ex-pen, fabric scissors, craft scissors, 1 pencil, chalk or a crayon, Pins or Clover Wonder Clips, wrapping paper and a ca. 60 cm for making the Pattern, your sewing machine and iron.
It is best to choose a ribbon to go with the school bag,

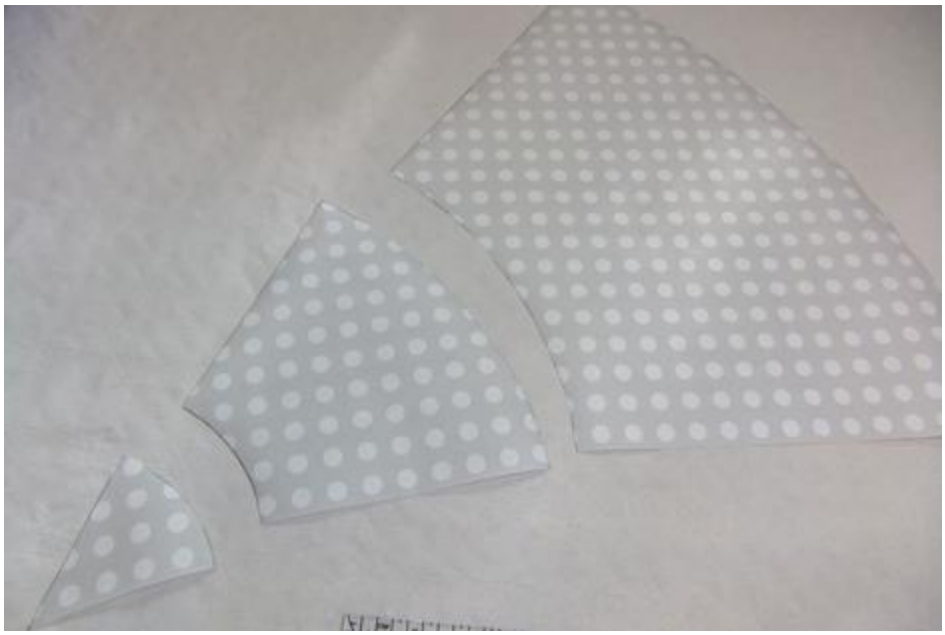

which can be used to close the filled bag on the day of school.

School gift bags-Use blank as Pattern-template

Arc shape: use as many auxiliary points as possible

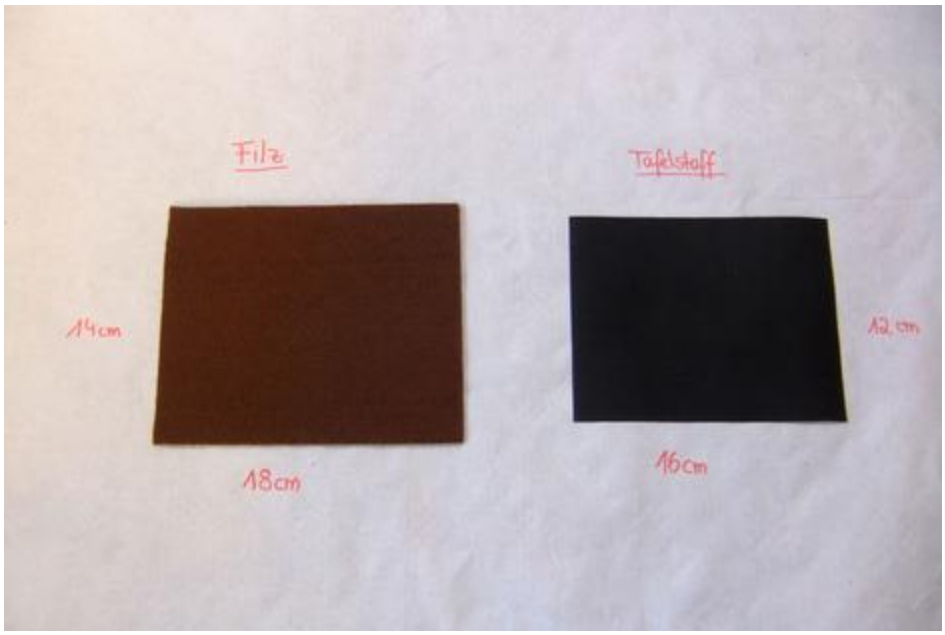

Various fabrics: share Pattern !

finishPattern

Now make a Pattern, by placing the blank on the edge of the wrapping paper sheet, holding the point with a steady hand and rolling the school bag once around (the adhesive seam serves as orientation) and set a mark with a pencil at the height of the upper edge. Now hold the blank and draw a line from the tip to the mark
For the arc shape, set as many help points as possible on your Pattern, which you will later connect to form an arc
If, as in the example, several substances are used, subdivide Pattern accordingly - here: 3 cut pieces

Cutting & Sewing

The individual pattern pieces are now transferred to the fabric with the help of the line-Ex pen. It is essential that a seam allowance of 1 cm is included. The individual pieces of fabric are now sewn together at the curves. Fold the fabric seam smoothly and, if desired, overstitch with a serrated tape.

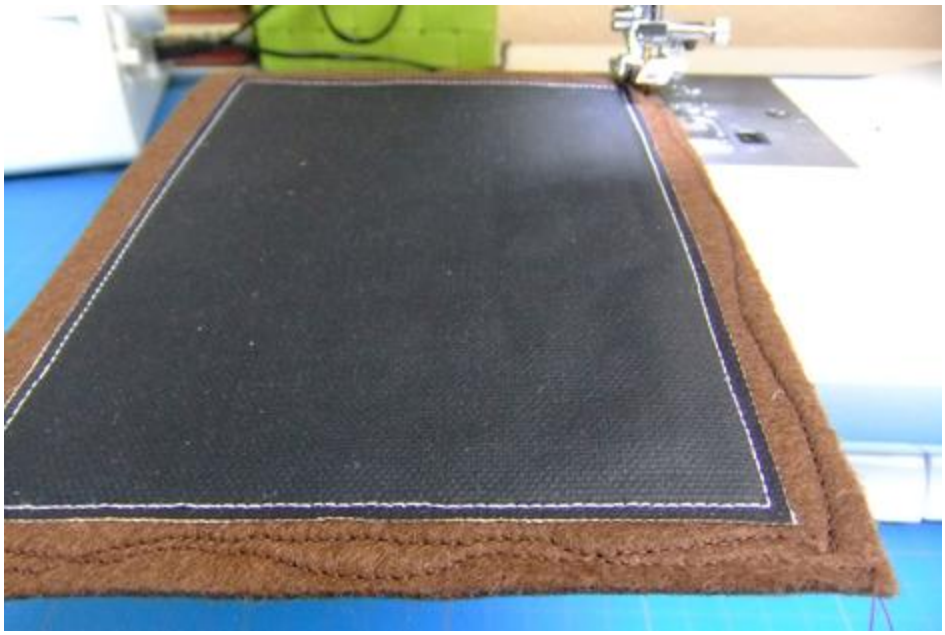

Cut to size

For the cloth board you need a piece of felt of the size 14 x 18 cm and a piece of Chalkboard fabric of the size 12 x 16 cm. Now position the Chalkboard fabric exactly on the felt piece and fix it

Sew fabric panel

The edge of the tablecloth is now quilted with white stitching just along the edge

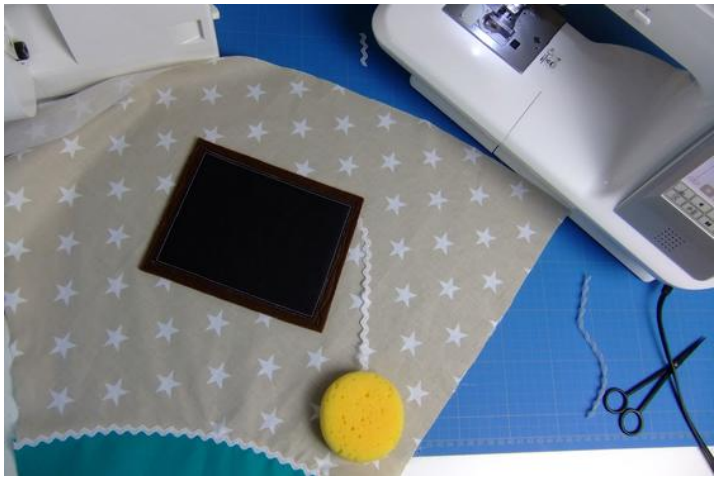

Felt with wood look

In order to give the Felt still some wood look, further uneven decorative seams are quilted with brown sewing thread on the Felt .

Alternative to the Chalkboard fabric

If you don't Chalkboard fabric have one available, you can make Cotton fabric Board paint one yourself. To do this, cut the fabric to the correct size as described Cotton fabric above and brush it with Between the Board paint. applications let the fabric dry well.
Also a nice idea is to cut one to size Cotton fabric and embroider it with the name of the ABC protector by hand Embroidery twist or with the sewing machine
Of course you can also sew on a motif. Ready-made appliqués are best suited for this. However, if you want to choose the motif freely and cut it out of fabric, it is advisable to transfer and sew it on with iron-on fleece.

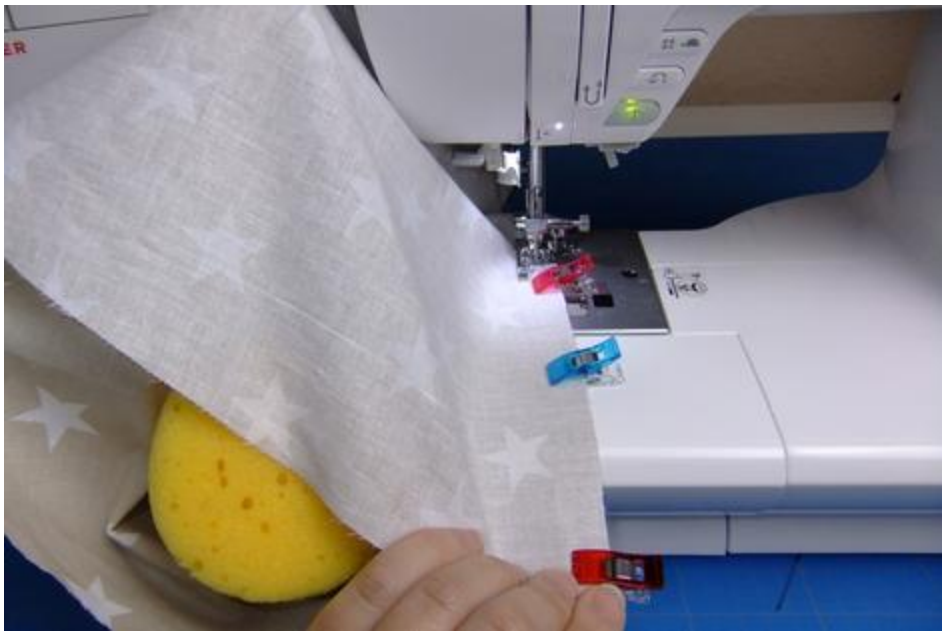

Sew on the fabric panel and Paint sponge

The Paint sponge is glued to a piece of serrated tape. Arrange the fabric board and the serrated tape with the sponge on the school bag fabric, place the Ribbon with the sponge behind the board and fix everything with pressure-sensitive adhesive (temporary spray glue) or with Pins . Now sew everything together with brown Yarn by a seam just at the edge of the inner frame. The serrated tape can also be sewn directly to the edge of the board with white sewing thread.

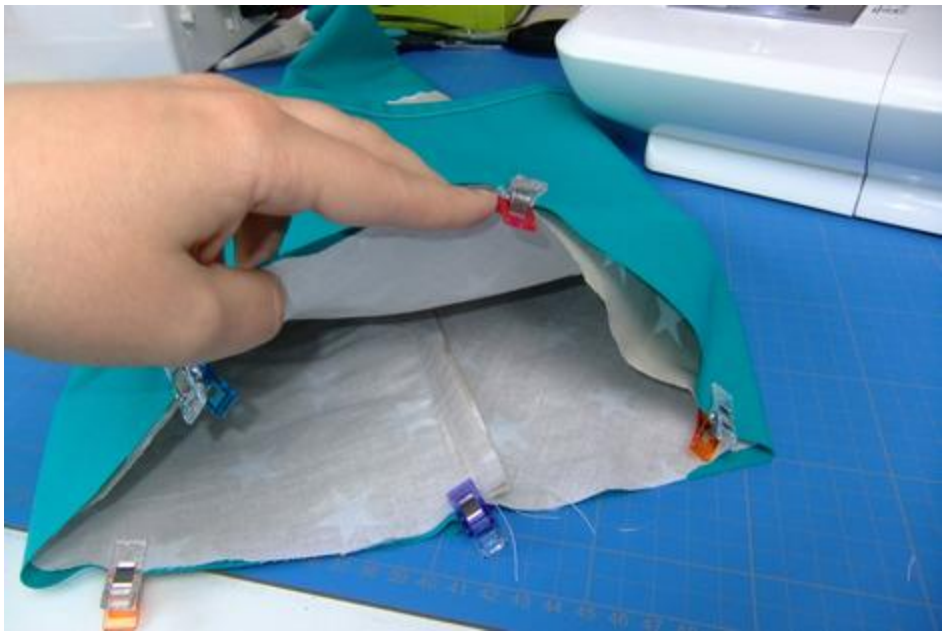

Extra tip: To position the fabric panel perfectly

For the exact positioning of the fabric panel on the school bag fabric we recommend working with temporary spray adhesive. This is sprayed onto the back of the fabric panel. This allows the board to be repositioned again and again, and it sticks. Another advantage: the sewing machine needle does not stick when sewing together
Of course the fabric panel can also be fixed with Textile glue . When using Textile glue the fabric panel is not sewn on only but is also securely fixed by the adhesive. Before continuing sewing, this glue must dry completely so that it does not stick to the sewing machine needle.

Sew rosette

For the **locking rosette** a rectangular Fabric cut **is** required with a height of 35 cm. The fabric length is made up of the circumference of the school bag opening and 2 cm seam allowance (approx. 61 cm). The circumference should be determined exactly with the measuring tape. Turn the fabric inside out, fold in 1 cm on the long side twice, iron well and topstitch the fabric edge with a straight stitch.

Finish of the School gift bag

Sew the fabric together at the short sides on links to form a fabric tube. **Stitch** the fabric shoulder bag and the rosette **together** on the left side **and** finally sew.

Finally everything can be turned around. Simply insert the school bag blank into the fabric for reinforcement, label the board with the desired name or slogan and of course fill the bag! Finally, it is closed with a pretty ribbon.

After schooling: Make a pillow from School gift bag !

The ingenious thing about this sewn school bag is its reusability. After schooling, simply remove the blank and **stuff** the school bag with **filling cotton wool** - and a great cushion is ready! The Chalkboard fabric can be labeled with a **permanentMarker**, so nothing gets blurred when cuddling.
