

Lamp made from craft blocks

Instructions No. 3258

Difficulty: Advanced 🍴🍴🍴🍴

Working time: 5 Hours

Are you looking for a unique, creative project for your home? Our step-by-step instructions will show you how to create a stylish lamp from craft blocks. This homemade lamp not only offers a customised lighting solution, but will also be a real eye-catcher in your home. Whether you want to spice up your living room or add a personal touch to your desk, this project is perfect for craft enthusiasts and creative minds.

Before you start gluing the blocks together, make sure you have all the materials to hand. The VBS handicraft glue is ideal as it sets quickly and becomes transparent after drying.

Start by creating the four side parts of your future lamp.

For each side part, you will need:

- Four 16 cm blocks
- Two 8 cm blocks
- Two 4 cm blocks
- Six acrylic blocks (three satinised and three clear)

Make sure that you leave out a 4 cm long craft block from one of the side sections. This will ensure that there is enough space for the plugs of the lampbase later.

After you have assembled the side parts, leave them to dry overnight and coat the wooden blocks with VBS acrylic varnish to give them a perfect finish. This not only gives them a great look, but also protects the wooden surface from external influences.

Glue the four finished side parts together at the outer edges with the handicraft glue. For additional stability, you can attach additional blocks from the inside for reinforcement.

Make sure that the lampbase still has enough space, then fit an E14 light bulb to the lampbase and once all the parts are sufficiently dry, you can carefully place the lampshade over the lampbase.

Finally, check that the lamp is stable and that the light emitted corresponds to your design!

Must Have

VBS Handicraft blocks, Ash wood
