Making luggage tags

Instructions No. 3036

Difficulty: Beginner

Working time: 2 Hours

Are you looking for unique and personalised luggage tags that you can use to recognise your luggage at any time? Let this creative idea inspire you!

Labeling with the branding pen

Would you like to inscribe an address or message on your pendant? Draw all the letters, symbols or even a drawing with the pencil and then use the branding pen to trace everything. The visible pencil lines can then be easily removed with the eraser. So that you can easily clean the wooden pendant after the trip, coat it with a protective layer napkin varnish. You can also place an inscription on the back of a pendant designed with laser-cut motifs.

Decorative wooden pendants

motif straw silk and lasercut motifs can be used to create particularly beautiful wooden tags. This is not difficult at all, as the wooden laser-cut motifs are already finished.

Take a motif straw silk of your choice and coat your wooden tag VBS Wooden tag thinly with napkin varnish. Place the straw silk paper on top and press it down carefully by hand. Then coat it again with napkin varnish. This is both glue and protective varnish in one.

Once dry, cut off the excess straw silk paper from the edges of the tag. Then glue the laser-cut motifs onto the pendant VBS handicraft glue the Lasercut motifs onto the designed tag. In our example, we have attached the luggage tags to the bag with a leather strap.
