Are you a fan of maritime decorations? With simple materials and a little creativity, you can easily bring a bit of that beach feeling right into your home. In this step-by-step guide, I'll show you how to create artistic maritime decorations using the simplest of materials. Whether as an eye-catcher in the living room or as an original gift - your creation is guaranteed to be admired! Let's go!

Step 1: Painting the anchor

The basis for this decoration idea is the craft blank VBS Wooden anchor. Start by priming the entire piece of wood with beige paint. Then color the lower part of the wooden anchor with colored stripes in sea green or a similar color: Use a ruler and pencil to draw fine lines on your workpiece that precisely define the individual colored areas and make it easier for you to paint with the maritime color. Make sure that the edges of the paint are as precise as possible.

Step 2: The gloss effect

Once you have painted your anchor in the desired colors, it's time for the gloss effect! cover the sections painted in sea green with 3D Hydro Varnish. Apply this varnish straight from the bottle. This special varnish gives your work a fascinating shine. Allow the varnish to dry thoroughly before moving on to the next step.

Step 3: sand and shells for that beach feeling

Mix handicraft glue and mineral sand into a creamy mixture. Apply this mixture to the bottom of your workpiece. Once everything is dry, use hot glue to attach shells. These details give your artwork an authentic look and beach feeling.

Step 4: The cord for the finishing touches

Wrap a jute cord around the anchor ring and fix the wrapped areas with a little glue. The VBS Wooden anchor is supplied with a suspension system. So you can attach your new maritime decoration to your wall straight away!
