# Maritime glass bottles with plotted motifs

**Instructions No. 1606** 

Difficulty: Beginner

Working time: 20 Minutes

This maritime colour design can be easily and quickly realised with a plotter machine. The pretty maritime bottles are then a great eye-catcher for your home.

## Extremely pretty - extremely quickly manufactured

#### Be creative with Colour spray

The bottles are first of all produced in different colours with a <u>Colour spray</u> colored. The product instructions provide very good tips on how to spray optimally.

We recommend that you protect your clothing and the spray environment as much as possible: Creative apron and cut open cardboard box in which the bottles can be placed for spraying.

### Maritime stencils from the plotter machine

Print maritime motifs with your **plotter** according to your personal taste on a self-adhesive vinyl film and place them on the coloured dried glass bottles.

If you do not have a plotter machine at your disposal, you can also transfer the embossing templates suitable for plotter machines by hand with a Strich-Ex pen onto the self-adhesive vinyl film, then cut out the contours with scissors.

The pretty glass bottles are then finished with a little Jute ribbon wrapped. This, and possibly shells or

other accessories, give them that "certain something".

Simple & plain...

..with Jute ribbon..

...or in writing!
