Maritime glass engraving

Instructions No. 1727

Difficulty: Beginner

Working time: 2 Hours

These tea light glasses are maritime treasures! They were made with **Glass and porcelain paint** processed, with great motives **engraved** and then **filled** with candle sand. Perfect for maritime landscapes in the bathroom or super decorative on the dresser!

And so it goes

First download the free **motif template** and print it out. In our example we have two of the glasses in advance with **Glass and porcelain paint** designed

To Glass and porcelain paint work on the tea light glasses, the surface should **be** clean **and free of grease**. The paint is now applied with a brush. Let the paint **dry** for about **four hours**. To ensure that the paint lasts, you should bake the tea lights **in the oven** at approx. 160 **°C for** approx. 90 minutes. **Important:** The glass must be placed in the cold oven. Only when the required temperature has been reached does the baking time begin. Afterwards, the

object must cool down so that the baking process is completed correctly

Now cut out the templates and glue them inside from Glass for tea lights. Trace the lines with the PROXXON **engraving set**.

Finally, place the candle wick in the middle and fill the glass with candle sand.

Must Have

VBS Tea light jars "High"

Content: 4 pieces
