

# Miniature workshop

Instructions No. 2933

Difficulty: Beginner 

Working time: 6 Hours

Well, who left their creative chaos in the workshop? It must have been a little secret santa. With our craft instructions, you can create a little Secret Santa door with a miniature workshop in no time at all. A great idea for the Christmas season for young and old!

First, cut the wooden spatulas and wood with scissors and glue them together to form a workbench, door and window with craft glue.

After the glue has dried, you can paint the Secret Santa door, workbench and window with craft paints. Allow to dry. Stick lamp foil behind the window and the door window.

Cut some steel pins with a pair of side cutters and glue them to the workbench to hang them up.

Decorate the workbench with other miniatures and arrange everything into a miniature scene.
