Self-cast bed stones

Instructions No. 1896

Difficulty: Beginner

Working time: 2 Hours

Off to the vegetable patch. These self-cast and designed bed stones make it easier to find the right vegetables. As soon as it gets a little warmer outside, many go out into the garden and plant vegetables, herbs or plants in the garden. So that one knows later where one has planted what, stones can be labeled with the vegetables and placed on the spot in the bed. They are also a beautiful eye-catcher in your garden.

Pour stones

First mix concrete **with** water to a creamy mass and fill it into the mould. Let the concrete dry for at least **12 hours**. Then turn the mould over and carefully press out the stones that have formed

Design stones

Now paint the stones completely with **painting ground**, so that the paint can not soak in later. After drying you can paint the stones with **VBS Handicraft paint** shape. Now with a **Marker** and finally coat everything with **weather protection impregnation**.
