tealight holders design with colors

Instructions No. 2872

Difficulty: Beginner

Working time: 0 Minutes

In keeping with the festive Christmas season, we present you with the tutorial: "Designing tea light holders with colours". With creativity and crafting fun, you can create your own atmospheric decoration.

Now colour comes into play

First paint the individual parts of the tealight holders with craft paints of your choice. For our example, we have opted for Scandinavian colors, but which colors you choose is entirely up to you.

Once the paints have dried sufficiently, the houses and fir trees, as well as Santa Claus and his reindeer, can be fixed in place from below with a little handicraft glue and inserted into the rails. Glue the underside to ensure that everything stays securely in place.

Only the finer points

Paper Finally, glue the only lace border around the aluminum frames of the tea lights. This creates a great look and significantly enhances the whole thing.

Now you have a great, painted tealight holders, that looks great on the windowsill or dining table.
