Tiles with Pouring Optics

Instructions No. 1800

Difficulty: Beginner

Working time: 1 hour

This summer, no one can escape the tile trend. We have still combined the whole thing with the pouring look and created beautiful works of art. In summery colours, these tiles spread a good mood! Perfect as a glass coaster or simply as a little spot of colour on the table.

Before the creative fun begins, you should lay out your work surface with foil or newspaper to avoid contamination

Now start by mixing the **cold glaze** according to the package instructions. Always spread small portions of the glaze in the **mini cups** and add one drop of **tinting paint** per cup and mix well again

Place a paper cup on the work surface and place a tile on top. Now gradually apply the different **colours** in patches on the tile. Use a **hot-air blow dryer** to achieve the gradients and effects by blow-drying the glaze together. In this way, you can create your own tiles with a pouring design, just as you like. Allow to dry for at least 24 **hours**.

Must Have

Tiles, Matt

Content: 4 pieces
Length: 15 cm
Width: 15 cm
Material: Ceramics

5,95 €
