Wooden Stick Lamp

Instructions No. 2160

Difficulty: Beginner

Working time: 1 hour

With this chic DIY lamp made of wooden sticks you give any room a wonderfully warm light and conjure up a cozy mood. The table lamp is ready made about 33 cm high.

And this is how the lamp is made:

Step 1:
Saw four square strips to a length of 33 cm each, sand the ends.

Step 2:
The lamp base has four sides of about 11.5 cm each (measure to be sure).Transfer the measurement to the lamp foil.Use a ruler and a cutter knife to score three lines into the foil as a folded seam at the distance of the measurement. Fold it along these lines and cut off the protruding material.

Step 3:
Now glue the foil to the lamp base, placing glue along the cut edge as well. Using the wood glue, glue the square strips at right angles to the corners of the lamp base on the folded seam.

Step 4:
By gluing the wooden spatulas across and staggered on the square strips, you will get the attractive striped look of the table lamp.

Tip:
To craft the lamp as shown, you will need 2x the VBS wooden sticks XXL, as well as 2x the square wooden square pine strips, 1 m, 10 x 10 mm.

Must Have

VBS Wooden spatula "Maxi", 50 pcs.

Content: 50 pieces
Length: 15 cm
Width: 1.6 cm
Thickness: 1.5 mm
