

Painting idea: acrylic markers on canvas

Anleitung No. 2190

Let yourself be seduced by this original edding creative idea for your own painting projects. The step-by-step instructions show you how easy it is to capture your own ideas on the stretcher and paint them out.

Material

You will need a canvas, edding acrylic markers and a matching idea.

For the picture with the blood orange, it is best to use a stretcher frame in the format 24 x 30 cm, the edding acrylic marker set 5400 "Acryl 3D-Basic", Double Liner, set of 5 and the motif of a blood orange as a template.

1. Transfer motif template

2. Coloring

Simply place the template behind the stretcher frame. Hold it against the light so that the motif shines through the stretcher and transfer the contours with a pencil.

Color the picture area by area. The acrylic 3D-Basic acrylic markers from edding are ideal for painting. They have two felt tips: a 2 - 3 mm round tip and a 5 - 10 mm calligraphy tip.

3. Flat painting

To give the image a spatial look, a shadow is painted with dark color.

4. Shading for optical depth

Apply a darker acrylic paint to a light colored area, possibly smudging it a bit with a cloth.

5. Bright highlights

Optical highlights are painted on the dried acrylic image with light color.

6. Let the picture dry & hang it up

We hope you enjoy painting!
